

DriveHealthy™

Cleaner Air *Inside* Your Vehicle

**Eliminates Harmful Pollutants
the Human Nose CAN'T DETECT!**

The **ONLY** Vehicle Purification System that **PROTECTS YOUR HEALTH!**

Deodorization of
All Smells/Organic Odors

Air Purification

Prevent Spread of
Germs and Disease

Eco-Friendly, NON-Toxic,
Light Activated,
Patent Pending

Drive Healthy™ The First Permanent* Air Purification System FOR YOUR VEHICLE

Drive Healthy™ is the ONLY Air Purifier for your car that **PURIFIES THE SURFACES AS WELL.**

Applying **Drive Healthy™** to dash boards, headliners, seat backs, doors and handles will turn them into self-sanitizing surfaces with the ability to destroy and prevent the spread of common colds, flu's, and viruses, including the dreaded anti-biotic resistant MRSA and E-Coli bacteria. All that's needed to turn your vehicle surfaces into Self-Sanitizers is **Drive Healthy™** and LIGHT!

The ONLY Vehicle Purification System that PROTECTS YOUR HEALTH!

One treatment can remove harmful carcinogens found in the glues and plastics used to manufacture car interiors as well as remove and prevent the return of:

- *Foul odors and allergens such as food smells*
- *Tobacco smoke*
- *Body odors*
- *Pet smells*
- *Diesel*
- *Exhaust emissions & noxious organic fumes*

Even Those Odors That Have Been In The Vehicle For Years Can Be Removed

A team of scientists at U.C.L.A. discovered that the risk of heart disease, heart attack, or stroke increases by 70% through exposure to fumes commonly found in vehicles.

Drive Healthy™ is different because it constantly scrubs the air clean as you drive, creating a healthy breathing environment.

Drive Healthy™ is easy to apply, environmentally friendly, non-toxic, Ph neutral and creates a permanent invisible bond with your vehicle at ambient temperatures.

Drive Healthy™ is the smart way to eliminate odors and allergy triggers from your vehicle. One application lasts for years not hours like the competition. (See the comparison chart)

Drive Healthy™ is safe and simple to use – so safe in fact that the key active ingredients have been approved for many years for use on food and in food packaging.

Vehicle Markets That Need Drive Healthy™ To Protect Our Health

- *YOUR Car, Truck RV or Boat*
- *Rental Car Companies*
- *Car Washes*
- *Auto Repair Shops*
- *Auto Body/Collision Shops*
- *Auto Upholstery Shops*
- *Oil Change/Lube Quick Service Companies*
- *Used Car/Truck/Boat/RV Dealers*
- *Used and New Car/Truck/Boat/RV Repair Shops*
- *School Buses*
- *Public Transportation*

*Make driving healthier
for your children*

*Permanent meaning it will last for years before re-application will be needed vs the typical air fresheners/deodorizers that must be continually reapplied.

Did you know...

What most people use to “freshen” the air of their car isn’t good for them? Scientific evidence proves it; just read the below test performed on **Drive Healthy™** and the other leading vehicle air sanitizers.

One Green World, Inc. Drive Healthy Odor Causing Molecule Test

The Cosmos XP 329 Portable Odor Level Indicator is an extremely sensitive piece of equipment designed to precisely measure odor causing molecules and VOC’s (Volatile Organic Compounds) like lead, arsenic and 100’s of other harmful carcinogens.

The higher the number of the reading, the higher the concentration of odor causing molecules and VOC’s.

To get a random sampling of the most popular air fresheners used in the marketplace we went to 4 different sources to purchase them: a full service car wash, a grocery store (Ralphs), a drug store (Rite Aid), and a mass merchandiser (Costco Wholesale).

In each vehicle we took a baseline measurement prior to introducing any **air fresheners**. We then treated/installed the air freshener in each vehicle as directed. We then took another reading with the precision odor/VOC Meter.

Odor/VOC Level in Vehicle

Name of Air Freshener	Type	Before Treatment	After Treatment	Increase/ Decrease	% + or -	Must Be reapplied when odors return?	Flammable	Eye Irritant
Leading Competitor #1	Fine Mist Spray	360	1880	1520	422%	YES	NO	YES
Leading Competitor #2	Fine Mist Spray	368	1909	1541	419%	YES	YES	YES
Leading Competitor #3	Fine Mist Spray	378	1707	1329	352%	YES	YES	YES
Leading Competitor #4	Fine Mist Aerosol	380	1901	1521	400%	YES	NO	YES
Leading Competitor #5	Mist Spray	399	1304	905	227%	YES	NO	YES
Drive Healthy™ The World’s First Permanent Air Purification System For Your Vehicle	Fine Mist Spray	371	73	-298	-80%	NO!	NO!	NO!

What people really want is NO Odors, and once the Drive Healthy™ is activated with sun light for a few hours it will continue its air purification process for years and provide that clean odorless air in their vehicle as long as it is exposed to light

Apply **Drive Healthy™** to all interior areas where light is visible and there is little repetitive abrasion. This includes; dashboards, doors, headliners, backs of seats, child car seats, carpets.

How Drive Healthy™ Works

Drive Healthy™ contains a proprietary formula of super oxides and hydroxyl radicals called PureLife™. The PureLife™ bonds, which are a formed of active oxygen, are generated on a surface treated with **Drive Healthy™** and when UV light rays are absorbed into these bonds the electrons are excited.

When organic matter (germs and substances responsible for foul odors) comes into contact with these treated surfaces they are oxidized, broken down and removed. The organic matter that causes foul odors and disease is thereby subjected to sterilization, deodorization, and antifouling causing and the removal of pollutants to be achieved. The oxidation occurs in many ranges of light, so both indoor and natural light will activate the coating. Moreover, as UV rays are part of sunlight and fluorescent light, no special operating costs are required and thus the reaction can be maintained permanently.

With **Drive Healthy™** you’ll be glad to know that air and surface quality in your car is always optimized. A completely safe and invisible coated layer applied to interior of your motor vehicle allows it to cleanse the air effectively by decomposing contaminants and releasing pure, fresh, natural oxygen(O²) back into your indoor environment. Pollutants such as NOx (nitrogen oxides), SOx (oxides of sulfur), dioxin and VOC’s, carbon monoxide(CO), odor-causing compounds, virus and bacteria disintegrate and simply evaporate into the air.

Delivery Systems for Drive Healthy™

For Individual Use:

Pump Spray Bottles

VOC-Free Aerosolized Cans

Pre-Moistened Touch-up Towelettes

For Commercial/High Volume Use:

HVLP (High Volume Low Pressure) Sprayer with small air compressors (or other air source)

For commercial and mass public use

The **ONLY** Vehicle Purification System that **PROTECTS YOUR HEALTH!**
